SIGBOVIK 2008

www.sigbovik.org - April 1-6, 2008

FINAL DEADLINE FOR PAPERS/ABSTRACTS/RANTS:

Wednesday, March 19

CONFERENCE:

Sunday, April 6

(Papers must be recieved by midweek to be included in the printed proceedings. Later papers may be included in the online proceedings, and, by request, talks may be given at the conference even in the absense of a written submission.)

SIGBOVIK celebrates the inestimable research work of Harry Quango Bovik. Since his research has been so variegated, the conference is traditionally a forum for discussion on many subjects: Inept Expert Systems, Deep Space Navigation, Science, Perplexity Theory, Thaughmaturgic Circle, Self-Adjusting Computation, Denotational Semantics of Pidgin and Creole, Blog Shapes, Spatio-Temporal Clusters, Comparative Genomics, Dimorphic Computing, Natural Intelligence, Artificial Stupidity, Elbow Macaroni, Rasterized Love Triangles, Synergistic Hyperparadigmatism, Computational Archaeolinguistics, Modal Code for Mobile Types, Operational Semantics of Chevy Tahoes, Hyper Driven Devices, and any other topic approved by the conference organizers. The Program Committee seeks submissions on the entire range of topics.
